

We at EDDADESIGN give solutions through product innovation. We are Spain's leader on product design and we keep getting better at it as our clients' confidence and number grows.

WHAT WE DO

We excel in product design and innovation focused in creating new business opportunities, gaining new communities of costumers and reinforcing brand loyalty through product design.

WHO WE ARE

We are a company founded by Jordi Milà in 1995. We have a multidisciplinary staff that mixes Spanish and around-the-globe talent ranging from designers and engineers to anthropologists and scriptwriters, which combine their efforts to give our clients the best solutions for their products at every stage of the design process.

We are based in Barcelona, and should you ever come to pay us a visit (which we'd love), our staff will be delighted to show you around and answer any questions or inquiries.

WHAT WE HAVE

We are constantly reinvesting in technology. Our studio is able not only to deliver prototypes in the shortest periods of time, but also to produce components or whole products in-house for projects that do not require an industrial production process.

SOME OF OUR TECHNOLOGIES

EOS plastic laser-sintering system for rapid prototyping.

VICON for our ten-camera motion capture set.

ICEM SURF for A-class surface modelling.

IDEAS/NX for engineering development.

MOLDFLOW for injection molding simulations that facilitate design and prevent delays in the time to market release and hidden extra costs.

SOFTIMAGE for 3D animation and modelling.

CLIENTS

ALLIBERT MANUTENCIÓN, S.A.
ANTIMIGRAIN
ARQUITECTURA TEXTIL S.A.
BABYNOW, S.L.
CARPYEN, S.L.
